SUMMARY

24 years old graduated in Computer Engineering with particular interest in the area of web development. I'm very interested in everything inherent to creativity, always with the ambition of thriving in the Front-end area. However, the same applies to Full-stack, as I am open to opportunities, always with the aim of constantly growing and learning. [Personal website link](#).

SKILLS

Front-end: CSS, SASS, Tailwind CSS, JavaScript, TypeScript, React.js

Back-end: Node.js (Express), PHP, Python

Databases: MySQL, SQL Server

Testing Tools: Jest, React Testing Library

EDUCATION

Instituto Superior Politécnico Gaya

2021 - 2024

Graduation in Computer Engineering

Instituto Superior Politécnico Gaya

2019 - 2021

CTeSP in Information Systems Technologies and Programming

EXPERIENCE

Eidosmedia

january 2025 -

Tech Presales

- Develop solutions that highlight the software core values to prospects and customers, e.g. J.P. Morgan, in the form of proof-of-concept;
- Support the preparation of responses to Requests for Proposals (RFPs) and other customer inquiries;
- Participate in product demonstrations and contribute to demo preparations;
- Collaborate with sales and product teams to gather and analyze customer requirements;
- Technologies used: JavaScript, Node.js (Express), jQuery, CSS, XML, REST APIs, Linux.

WideSkills - Instituto Superior Politécnico Gaya

february 2024 - july 2024

Internal Internship - Mental Health Portal

- I developed a website in the area of mental health as a final course project, with the aim of promoting awareness among university students about the importance of mental health and combating misinformation on the topic.
- I designed and implemented interactive and educational content to tackle and mitigate the lack of knowledge about issues related to mental health.
- This project resulted in the opportunity to write a scientific article, documenting the results and implications of the work carried out.
- Technologies used: HTML, CSS, JavaScript, PHP, Python.

WeCreateYou

march 2021 - august 2021

Curricular Internship

- I worked mainly with image editing, using Adobe Illustrator, with the aim of improving my user experience skills.
